Spray tan is a healthy alternative to tanning beds and sun bathing. It is not safe to have sunbath as direct exposure to sunrays for extended periods of time is harmful. This is because sunlight contains UV rays which can cause several types of skin cancer. In addition, a sunbath does not give a uniform body color texture and gets you thinking about your tan lines. The spray tan has special enriched formulae (with dihydroxyacetone) that is absolutely trouble free and gives you a long lasting effect resulting in glowing skin. Apart from all this, you will love the fact that our bronze tanning solution is completely free from side-effects and the session will be over within a few minutes.

Maintaining good skin texture is also very essential. Realizing this, we provide our clients certain valuable tips and plans that help them in routine skin care after the treatment. The color of tan should suit the color of your skin. We have a wide palette of tans for you to choose from. Hence, we provide customized spray tan solutions matching your individual skin color. In addition, you can have personal preferences too.

Our friendly, unparalleled services are cost-effective and highest quality. With fierce competition from other tanning beauty clinics, simply being the best is our winning strategy. We stand out by being among the best in the field.

Contact us soon to get gorgeous by availing our efficient and elegant UV-Free spray tanning services.

Loofer Gloves:

Loofer gloves are of immense importance since one needs to have a good exfoliation session at least 24 hours before the tanning. Loofer gloves gently rub off the dead cells that accumulate on our skin due to daily wear and tear of the skin. This exfoliation rejuvenates the skin and makes your tan set in well. A proper exfoliation not only guarantees a great tan but also its longevity.

7. Tanning and maintenance prep

To get best results from your sunless tanning session, you should take certain steps so that you look youthful as ever with your radiantly golden skin.

STEPS NEEDED TO PREPARE YOURSELF:**1. EXFOLIATE TO REMOVE DRY SKIN CELLS**

Dead skin cells will not allow reception and retention of DHA. Therefore, these dry cells need to be removed so that tanning spray gets into your skin to give you a natural and long lasting brilliant bronze hue. Using the body scrub on the morning of the seating is essential, as that will maintain a balanced pH of the skin.

2. DO NOT APPLY MAKE-UP OR PERFUME OR MOISTURIZING LOTIONS

Applying moistures, make-up or scent will hinder the spray tan color to enter in the skin evenly. It will not give the complete color finish. If you need, you can have a mild deodorant sparingly.

3. WEAR LOOSE DARK CLOTH

Tight clothing, shoes can remove the bronzers and you won't have a well blended finish.

4. WAX A DAY BEFORE

Removal of hair should be done before the session.

5. SKIN HYDRATION IS NEEDED

Prior to tanning, skin hydration ensures a darker tan and gives you the most natural color.

HOW TO MAINTAIN:

1. STAY AWAY FROM SWEATING

Stay in an air-conditioned room or use an air-conditioned car to avoid sweating.

2. KEEP AWAY FROM BODY SHOWER

Do not take a bath for 8-13 hours after the tan sitting. Do not use soap to clean your body, instead you can go for a mild body shampoo. Soaps with high pH will fade the tan. Body shampoos are formulated with cleansers that would hydrate as well maintain the pH levels of your delicate skin.

3. MOISTURIZE:

To give a prolonged touch of golden glow each and everyday to your skin, moisturizing is recommended. Elimination of dryness that could arise due to cold climate and sunless tanning is important which is balanced by application of daily twice moisturizers.

4. AVOID SWIMMING

Swimming in swimming pools that have chemicals like chlorine, treated water can remove the tan. So avoid swimming for a day or two.

5. SIT ON A TOWEL

If you sit directly on the furniture just after the session, your furniture could get patches of the bronze color. To prevent this you can sit on a towel.

6. AVOID WATER

You should avoid water for a minimum of 4 hours after tanning process or else, the tanning action will end up looking like a formation of streaks.

7. EXTRA TOUCH-UPS

To preserve the excellent deep color, additional color is required. We advice you to have at least three touch-up sessions in between the tanning sessions.

Follow this regime regularly and we assure you that you will definitely get rid of the dull look and induce yourself with the radiance you have been longing for. We proudly offer the complete line of skin care products that you will need the most for the tanning session and in between sessions. These will endow you with the desired golden bronze color of your valuable skin.
